

Sea Bay Game Company introduces the

Keeping Seniors in the Know!

Low Cost!!!

Large Screen Digital Display System

Calendar/Date and Weather Board/Message Board

Bring your facility into the 21st Century with the TelAgenda Digital Calendar/Message Display System.

-No more paper calendars and posters on the walls. Residents, families and friends will be impressed by the beauty of the digital calendar and attention getting messages as they scroll on your large flat screen TV in common areas of your facility (use an existing TV or purchase one the appropriate size for your needs) or connect to your in-house TV channel.

-Spend less time preparing your monthly calendar and more time with your residents. The TelAgenda calendar program is fast and easy. You can enter or edit information at work or at home from any computer. The information displays on the appropriate day. Your calendar will display as a clean, neat, crisp digital screen. You can print the calendar from your computer for a paper copy.

-Easily add any message screen you need such as Welcome, Birthdays, Daily Announcements, Menu etc.

-Families can have to access the monthly calendar by simply adding a link to the facility web site.

-No more changing cards on date or reality orientation boards every day. A weather and date screen automatically downloads each day for your city and updates every 1/2 hour.

-The dietary and nursing staff can also access the TelAgenda web site if a menu or health screen is desired.

-Residents will love seeing the photos from their parties and events. Just download and add text.

For more information call 1800 568-0188

Sample basic screen designs which scroll throughout the day on a flat screen TV in common areas of your facility.

A date and weather screen automatically downloads for your city. The weather updates throughout the day.

Download your photos and easily add text to have personalized screens scroll. Our PRO model also allows video clips to play.

Dietary staff can access the web site to post daily menus. Menus can be done ahead of time and scheduled for day to appear.

T E L A G E N D A

An activity screen for the day automatically displays with the activities scheduled from your monthly calendar.

Then add any number of additional screens, just choose a heading and banner color. .

Custom Screen CD

Also available is our Custom Screen CD which provides you with over 50 background images to use. With the TelAgenda link to a photo editing program you can add text to these images. You can easily create any custom screen. The Custom Screen CD contains various landscapes, seasonal, holiday and color images. Your custom screens are then easily downloaded to the Telagenda and will scroll on the date you schedule.

P900C- Custom Screen CD \$19.99

1 custom screen CD can be used on multiple units.
